### ABOUT

I am an UX Design student with web developer skills achieved during my Licence Professionnelle (Bachelor) in web development and my DUT (BTEC) in computer science. Design interested me for a long time and UX domain enable me to combine my computer science knowledges with new skills from design.

To my mind, **empathy** is one of the most important humain capacity to master UX Design.

### WORK EXPERIENCE

- 2017 - today**  
Enosis is a mobile application developed jointly with the Bordeaux University. It allows students to find places where other student have point of interests you have. My function is to develop and maintain the *front-end*. I created the UX & the graphic charter before worked on the code
- 2017**  
To conclude my Bachelor's Degree in Web development I made an internship at Loisirs Enchères start-up. I developped new functionalities and participated to the new UX strategy Internship - Loisirs Enchères
- 2016 - 2017**  
At Bordeaux University, we developped a platform which collect the opinions of products bought on Cdiscount website  
Université de Bordeaux
- 2016**  
At the end of my BTEC I made a internship which consist in developp a platform where the commercials can take information of a product when they need it for a sale  
Internship - Safran Helicopters Engine
